

# Sterling Services

Architectural Precast Specialists

## Regency Court, Guernsey

The first major project in Guernsey using architectural precast. Full advantage was taken in using precast to enable the arch units to be formed in one with an individual weight of 5 tonnes. The architectural load bearing precast façade was generally above a ground floor traditionally built granite ashlar façade.

### Materials

Wet cast medium etched precast, Horcott type, C40 mix design

### Duration

24 months

### Contract Completion

£600k

### Contract Value

£600k
